

GutHub

*The AI-powered gut health companion
that actually understands you.*

INVESTOR PITCH DECK · 2025

\$47B

TOTAL ADDRESSABLE MARKET

70M+

AMERICANS WITH GI DISORDERS

AI-First

PERSONALIZED NUTRITION PLATFORM

3 Tiers

SAAS SUBSCRIPTION MODEL

Gut health is broken. And it's getting worse.

Millions of people struggle with gut health daily — yet real support remains expensive, inaccessible, and frustratingly generic.

No Ongoing Support

A 45-minute consultation with a registered dietitian costs \$150-\$300, and patients wait weeks. Then care ends. There's no continuous loop of feedback and accountability.

Generic One-Size-Fits-All Advice

Most apps and diets ignore medical history, food sensitivities, stress, sleep, and medications — all critical factors in gut health outcomes.

70M+

Americans diagnosed with GI disorders including IBS, IBD/Crohn's, GERD, and celiac disease

\$3,900

Average annual out-of-pocket cost for GI-related medical care per patient

74%

Zero Symptom Tracking & Correlation

Users can't identify which foods trigger their symptoms because no tool connects meals, bowel health, and wellbeing in one unified view.

Of GI patients report that their symptoms significantly impact quality of life and work productivity

Introducing GutHub

Your personal AI gut health companion — combining deep personalization, continuous tracking, and expert-level guidance in one beautifully designed platform.

- 

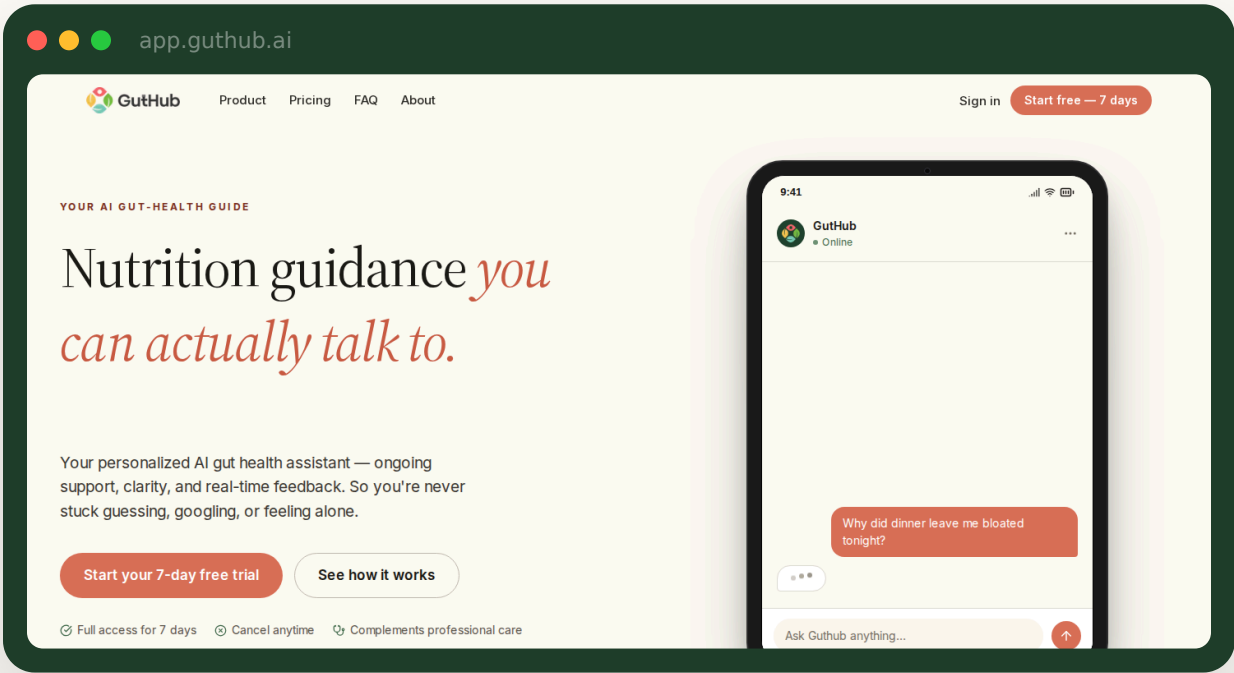

AI Coach — Always Available
GPT-5 powered conversational health coach that knows your history, conditions, goals, and food sensitivities. Ask anything, get personalized answers 24/7.
- 

Gut Score — Real-Time Health Metric
Proprietary algorithm combining diet, symptoms, sleep, stress, and bowel health into a single actionable gut health score updated daily.
- 

AI Meal Planner
Personalized 7-day meal plans built around your dietary restrictions, allergies, eating style, and gut health goals. Regenerate individual meals instantly.
- 

Symptom-Food Correlation Engine
Automatically identifies which foods correlate with symptom flares using 30-day tracking data. Visual insights that take months of journaling to discover manually.
- 

Eat Out Guide & Doctor Report
Safe menu choices at restaurants based on your profile, plus exportable doctor-ready health summaries for clinical appointments.

A \$47 billion market ready for disruption

TAM — TOTAL ADDRESSABLE MARKET

\$47.4B

Global gut health & digestive care market, projected 2028

SAM — SERVICEABLE ADDRESSABLE MARKET

\$12.1B

US digital health & AI nutrition market, 2025

SOM — SERVICEABLE OBTAINABLE MARKET

\$480M

Reachable within 5 years via direct consumer + B2B channels

Market Tailwinds

- **AI health adoption surging:** 63% of consumers now comfortable using AI for personal health guidance (Deloitte, 2024)
- **Gut-brain axis research:** Exploding awareness linking gut health to mental health, immunity, and chronic disease
- **Preventive care shift:** Healthcare systems investing heavily in prevention to reduce \$136B annual GI hospitalization costs
- **Subscription health habits:** Consumers already pay for Calm, Noom, and MyFitnessPal — gut health is the obvious next category

"The gut microbiome is the most significant medical discovery of the 21st century. The apps to manage it haven't caught up — yet."

HEALTH TECHNOLOGY ANALYST, 2024

Eight features.

One complete platform.

Every feature is interconnected — data from logging feeds the AI coach, which informs the meal planner, which connects to eat-out recommendations.

Today Dashboard

Gut score ring, macro progress, weight trend, water tracking, and daily summary at a glance.

Comprehensive Logging

Meal (6 types incl. beverages), symptoms with severity + onset time, bowel movements, water, weight, and free notes.

AI Health Coach

GPT-5 powered streaming chat with full user context. Image upload, thread history, auto-titling, meal plan saving.

AI Meal Planner

7-day personalized meal grid. Generate full week or swap individual meals. Accept/reject each suggestion.

Insights & Analytics

30-day trend charts, symptom frequency analysis, food-symptom correlation AI, visual health summaries.

Eat Out Guide

Restaurant-specific safe food recommendations based on personal dietary profile and sensitivities.

Doctor Report

Exportable clinical-grade summaries of gut health trends, symptoms, and diet for specialist appointments.

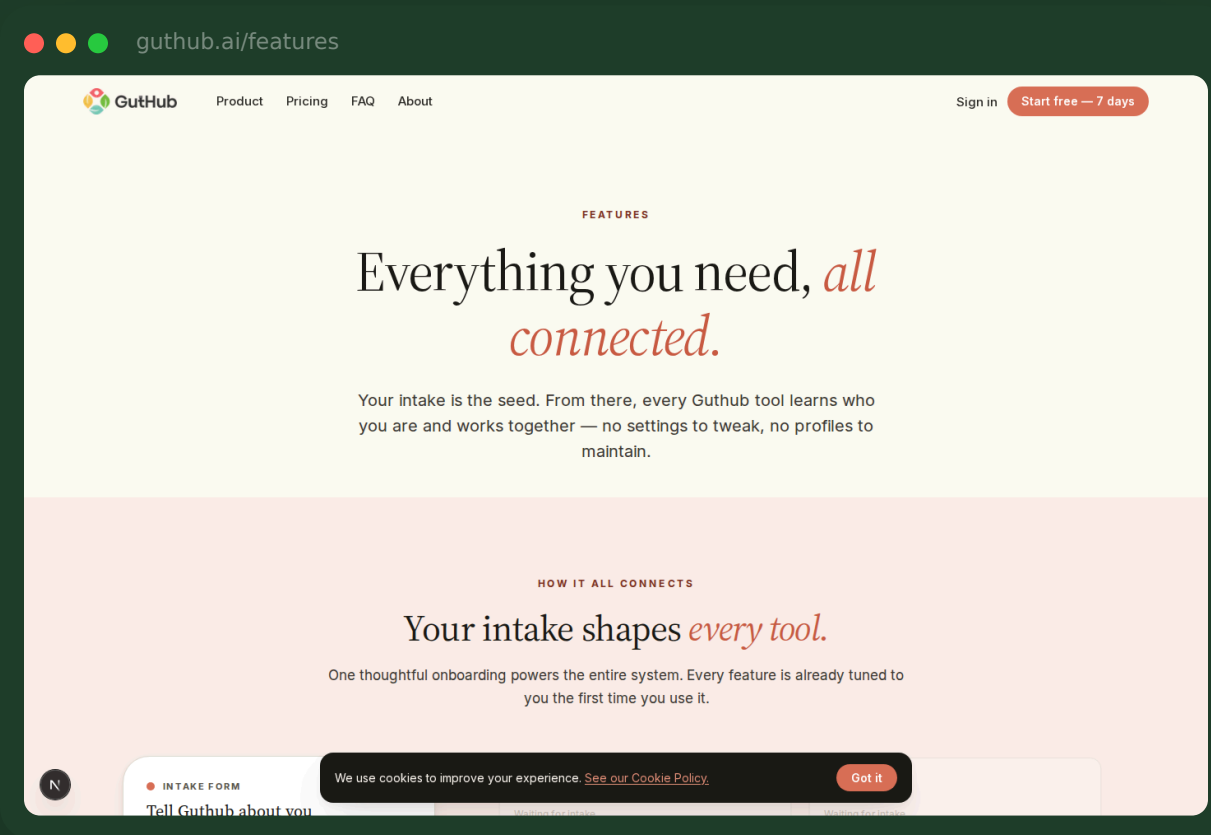

Smart Onboarding

6-step intake capturing medical history, allergens, eating style, goals, sleep, stress — powers AI personalization.

delight

Every screen is designed with intentionality — forest greens, warm terracotta, and cream tones create a calming health environment.

DESIGN PHILOSOPHY

Health apps often feel clinical and cold. GutHub is the opposite — warm, approachable, and encouraging. The design is inspired by nature and wellness, not hospitals.

MOBILE-FIRST RESPONSIVE

Fully responsive across all devices. Users log meals on mobile immediately after eating — the logging interface is optimized for one-handed, under-30-second entry.

ACCESSIBILITY

WCAG AA compliant color contrast, semantic HTML, keyboard-navigable interactions, and screen reader support throughout.

Simple SaaS.

Powerful unit economics.

Three subscription tiers with 7-day free trial — no credit card friction, high intent conversion.

Growth through community and clinical partnership

Phase 1: Direct Consumer (Now)

🎯 IBS/IBD Community Targeting

Reach the 70M Americans with diagnosed GI conditions via Reddit communities (r/ibs, r/crohns — 400k+ members), Facebook patient groups, and condition-specific influencers.

📱 Content Marketing

SEO-optimized gut health content, low-FODMAP recipe guides, symptom explainers. Target long-tail queries with high purchase intent from GI patients.

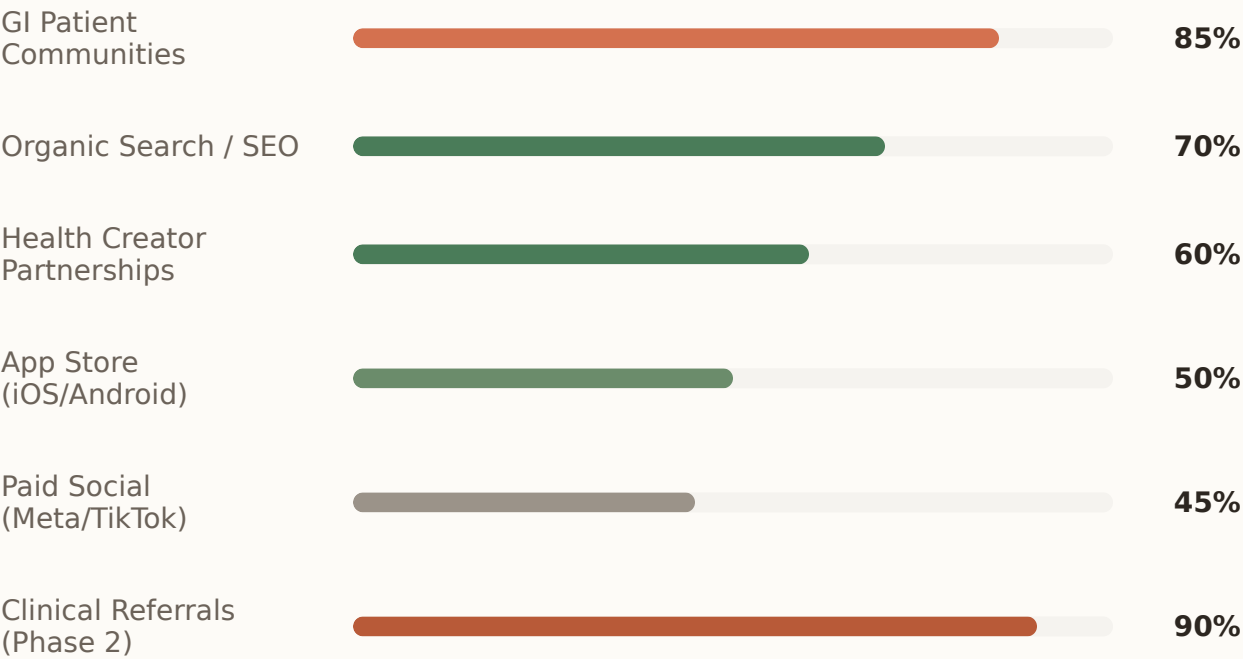

💰 Founding Member Urgency

Limited-time \$9.99/mo founding member pricing creates conversion urgency. Price locks in at signup — incentivizes early adoption and retention.

Phase 2: Clinical Partnerships (Q4 2025)

🏥 GI Practice Integration

Acquisition Channels

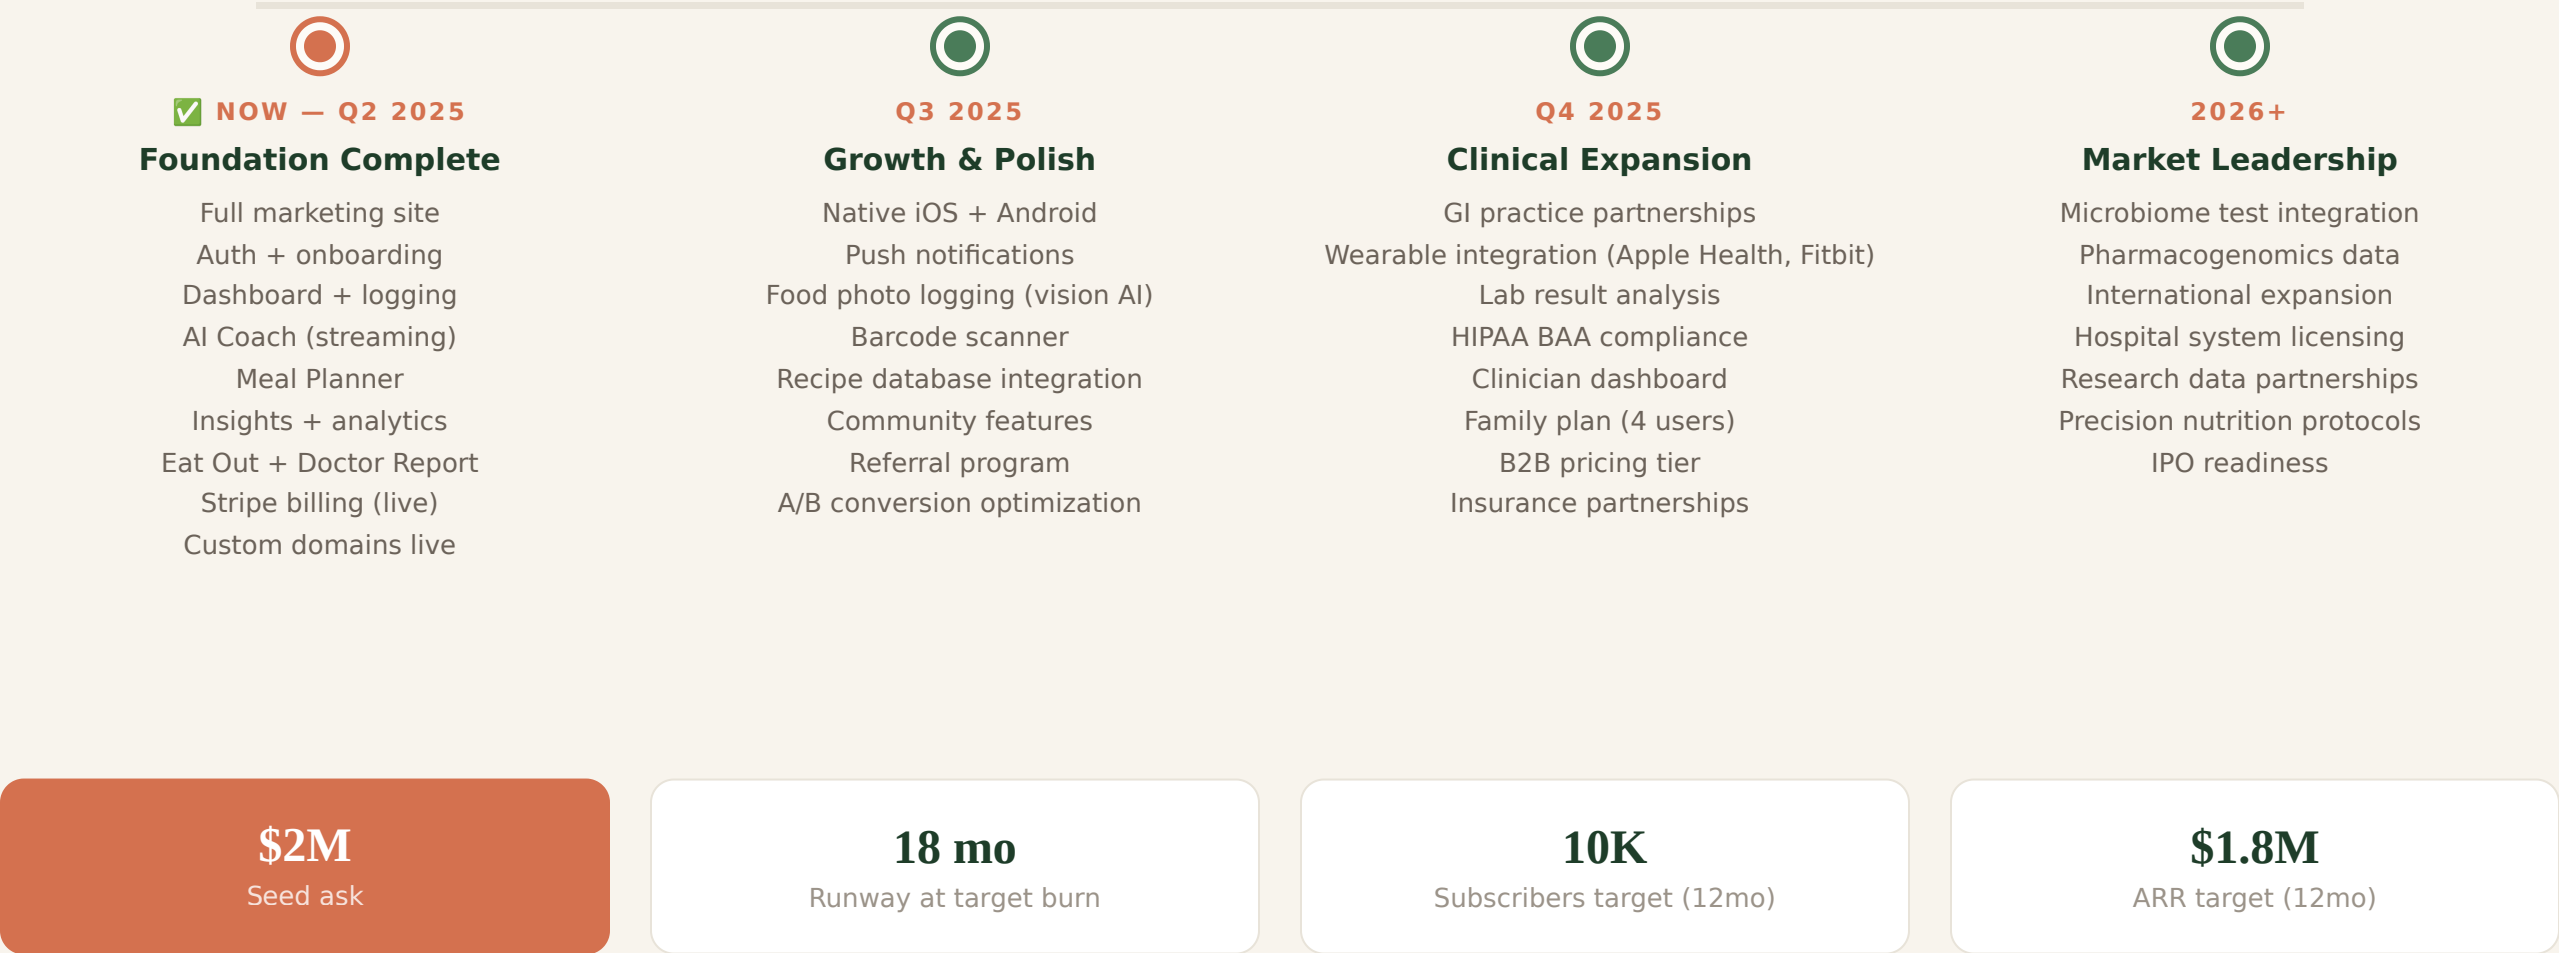

"We're not competing with dietitians — we're making their patients more prepared, compliant, and trackable between visits."

GUTHUB CLINICAL VALUE PROPOSITION

Partner with gastroenterology practices to offer GutHub as a patient monitoring tool. Doctor Report feature makes us immediately useful in clinical workflows. B2B licensing at 10-50x consumer price.

Where we're going **next**

A clear, capital-efficient path from consumer launch to clinical platform to market leader.

Why GitHub. *Why now.*

SEED ROUND

THE BOTTOM LINE

70 million people need this. GutHub is ready.

A production-ready, AI-first gut health platform with a clear market, powerful technology, and a path to category leadership.
